

ANNABELLE

Yes, that's the pup's name, and quite appropriate at that. Just call her Annabelle!

And the winner?

Gulielm (Guldy) Smith of Bassano receives the whole dollar, his entry having been drawn from the hat by C. E. Burgeson and appropriately witnessed.

For ourselves, congratulations, Guldy; and for Annabelle, thank you for the name.

And seriously, folks, we heartily thank you for the interest you took in creating some amusement in this little contest. We only wish we might give away a prize.

You know, when we broke the news to Annabelle she was very pleased, and, being very, very original, she reversed the usual order by christening us instead.

For our own amusement and the edification of our friends we list the names received below:

Skeeter, Al Hansen; Windemore, Gordon McLane; Tools, Teddy Rodmond; Nellie, Stanley Shorewood; Prince, Billie Stiles; Lucy, Raymond White; Queenie, Wally Fraser; Bonnie, Leslie Love; Annabelle, Guldy Smith; Susie, Johnny Prager; Mimi, Donald Fraser; Lennie, Norman Ingeberg; Snort, Irvin Young; Polly, Bob Currie; Hall, Hollander; H. Sandberg; Cleopatra, Marc Beeber; Wackler, M. Harper; Mickey, Bob Stiles; Lady Guinevere, Johnny Scher; Sally, Bobby Wright; Wynnie, Barbara Beeber; Pansy, Mildred McLean; Tilly, Graham Cathro; Dixie, Donna Flanagan; Rusty, Maudie McLean; Flap, Lorna McLean; Maudie, Maudie McLean; Queenie, Marc Flanagan; Taddy, Jack McLean; Skeeter, E. G. Calbeck; Mattie, Ruby Bole; Tixie, Tommy Bole; Mimi, Bob Bole; Minnie, Bobby Bole; Browne, Harry Jackson; Badie, Mrs. H. Beeber; Dorothy, Dorothy Beeber; Swede, H. D. Bacon; Trissie, Warren Jackson; Donna, Toronto Joe Fendry; Arlie, Gordon Pich; and Joe Stiles was a couple of days late with it.

BASSANO MAN BANK TELLER IN HOLD-UP

Attempted Holdup of Landon Bank—Knowledge of Robbery by Police Thwarted Robber—William Cathro of Bassano is Teller.

Wounded in the leg by his own gun a lone bandit who attempted to hold up the Royal Bank of Canada branch at Landon on Saturday morning, remained in R.C.M.P. cells a few hours later.

At 10:15 o'clock a man with a gun in each hand entered the Royal Bank instructing William Cathro to "stick 'em up" and added at the same time "this is a holdup".

After a struggle in which the order been uttered that two R.C.M.P. constables popped up from behind the counter issuing a like order to "stick 'em up".

In his hurry to reach for the calling, the would-be bandit dropped one of his weapons—a .22 rifle out to revolver size. As it struck the floor the catch caught and fired the weapon, driving a bullet into the calf of his left leg. He was immediately placed under arrest and brought to Calgary.

William Cathro is the son of Mr. and Mrs. D. Cathro of Bassano.

ROSEMARY

ROSEMARY, Sept. 12.—Mr. and Mrs. Roy Norton, Mrs. Roy Gallup and Mrs. and Mrs. John Norton were Medicine Hat visitors on Saturday.

Mr. D. MacLeod and Dorothy and Audrey were visiting old friends last Sunday in Glen colony.

Mrs. John Peterson and children spent a few days last week visiting the former's sister, Mrs. J. Peasey.

Services were held in the L.D.S. hall on Sunday evening when Mr. Palmer of Lethbridge spoke to a fair sized audience.

The Ladies' club held their meeting at the home of Mrs. Ed McClahan last Thursday. The next meeting will be held at the home of Mrs. William Jones on October 8.

Six threshing machines are busy threshing in this vicinity.

John Patkau will attend Normal in Calgary this winter.

Mr. and Mrs. Roy Stetson visited at the home of Mr. and Mrs. E. Lagani on Friday evening.

Subscription per annum: \$2.00; Foreign: \$2.50.

Aberhart Prepared to Make Gigantic Effort for Scheme

By CHESTER A. BLOOM

EDMONTON—Many financiers and business men in Alberta are beginning to feel themselves with the idea that William Aberhart, premier of Alberta, is cooling off on his idea of instituting his personal brand of social credit. Nothing could be farther from the truth. They think that Mr. Aberhart, finding himself involved in efforts to solve present financial difficulties of the province, will gradually back away from his plans to fix prices, levy on what he calls unearned increment of processed or manufactured goods, and pay all Alberta residents a basic dividend—mentioned at as anywhere from \$25 to \$75 a month.

Those men are dwelling in a fool's paradise. The writer, who has had plentiful opportunity of talking to and observing Mr. Aberhart at close quarters in the period since he assumed the premiership wishes to go on record as saying that William Aberhart is completely sold on the idea of social credit. He is going to make the most gigantic effort of any individual in the history of the country to actually attempt this scheme.

More determined, dedicated or forceful character has ever taken position in Canada as premier of a province. His new cabinet all stand in the same line. He is the word of their intention is absolute law.

Reiterates intention

Moreover, Mr. Aberhart has just issued a copyrighted interview to the Canadian chain of newspapers reiterating his intention of registering all the people of Alberta in order that a list price may be established which is fair to both the producer and distributor on the one hand and the consumers on the other.

He said: "After this financial disaster, the Social Credit act will be drawn and the issuance of basic monthly dividends will be given."

Mrs. Margaret Sykes and Norma Leggat spent the week-end in Calgary.

Mrs. M. Nelson, who is teaching at the school of Mrs. Aberhart, is teaching at her parents.

A daughter was born to Mr. and Mrs. McKinnon on Sunday morning, September 8, at home.

Dr. Scott was in Huesar Sunday morning.

Mr. and Mrs. J. Charteris, brother of Mrs. Aberhart, returned from Great Falls, Montana, to visit Mr. Charteris' sister; he spent the last day of August and September 1, leaving for the return trip on Monday.

Mrs. F. A. Lynch and son, Ned and Bob, and daughter, Dolly, spent the week-end with Mr. and Mrs. T. Lawson.

Rev. A. H. Aldridge and Mr. A. H. Brewell of Rockford, returned for the Sunday service. Rev. Aldridge will preach here on September 22 at 12:15.

Mrs. Ada Pile of Drumheller is teaching the Alberta school.

Emerson Brown and Mrs. A. A. Anderson were Bassano visitors on Monday.

Mr. and Mrs. S. Lawrie motored to Bassano on Saturday evening to see the doctor as Mrs. Lawrie had a narrow escape when Carl Sandberg ran over with his bicycle on the same evening. Mrs. Lawrie Sr. is down from Calgary with them for the present.

Mr. and Mrs. W. R. McLean and Bobbie, and Bruce Bell, spent Sunday with their parents.

Harvesting is well along, but slight frosts and the wind have caused delay.

Word arrived on Monday that Lillian Harmer, who was rushed to the hospital on Friday with a ruptured appendix, is holding her own, though her condition is serious.

Mrs. and Mrs. T. L. Montgomery and Art Flanagan motored to Hinton on Sunday for the day.

Mr. R. Allen, Miss J. O'Donnell and Mr. T. O'Donnell of Wayne motored over from Wayne on Sunday to visit Mr. H. Allen, principal of the Huesar school.

A crowd of young people had a winter's rest at the Backwater camp on Sunday.

There will be a picture show here on Wednesday evening, the first of the season.

The Sunday school opened again on Sunday.

GOODLY TURNIPS

M. D. Bacon of the Bassano Nursery grows many varieties of fruit, flowers and vegetables. All kinds of them. But it appears that this year turnips are his specialty.

And what turnips! He has kindly distributed several of these turnips among "people in Bassano town, the Mail editor being one of the proud recipients. But though we gratefully acknowledge this turnip, we feel that we have been misled, not being among those to receive the large ones.

Our only weight 11½ pounds.

Lively Session at Board of Trade

A brisk and interesting meeting took place the continuation of board of trade activities, after a vacation of two months, at the Imperial hotel on Wednesday afternoon.

Though current business was mainly dealt with, sharp issues arose continuously, which, though keeping the members on edge, were handled in a non-contentious manner. Several commendable reports were received, namely from the Carnival committee, the Swimming Pool committee.

President MacNaughton, speaking on the Dance committee, stated that the executive had appointed a committee consisting of Mr. W. C. Keith and H. H. Beeber early in the summer to arrange for dances. Due to misinformation, this committee had no official report, though the members from holding dances due to lack of extra facilities after giving the matter thought. The matter of dances was left in the hands of this committee.

The board of trade, which has been very active in endeavoring to establish Bassano as a centre for winter supplemental examinations in high schools, recommended that this question be taken up again with the department of education at the first of the year.

Under the new order of business, the motion of Jas. Johnston that H. H. Beeber be given the Carnival committee for board of trade purposes was passed. A motion by H. H. Beeber that the following regarding the question at meeting be changed to read 10 instead of 15 caused some comment. With twenty 60 members, Mr. Beeber said, and a good number of them, there was only one meeting out of seven last spring that had the necessary number at the start of the meeting.

Mr. and Mrs. J. Charteris, brother of Mrs. Aberhart, returned from Great Falls, Montana, to visit Mr. Charteris' sister; he spent the last day of August and September 1, leaving for the return trip on Monday.

Mrs. F. A. Lynch and son, Ned and Bob, and daughter, Dolly, spent the week-end with Mr. and Mrs. T. Lawson.

Rev. A. H. Aldridge and Mr. A. H. Brewell of Rockford, returned for the Sunday service. Rev. Aldridge will preach here on September 22 at 12:15.

Mrs. Ada Pile of Drumheller is teaching the Alberta school.

Emerson Brown and Mrs. A. A. Anderson were Bassano visitors on Monday.

Mr. and Mrs. S. Lawrie motored to Bassano on Saturday evening to see the doctor as Mrs. Lawrie had a narrow escape when Carl Sandberg ran over with his bicycle on the same evening. Mrs. Lawrie Sr. is down from Calgary with them for the present.

Mr. and Mrs. W. R. McLean and Bobbie, and Bruce Bell, spent Sunday with their parents.

Harvesting is well along, but slight frosts and the wind have caused delay.

Word arrived on Monday that Lillian Harmer, who was rushed to the hospital on Friday with a ruptured appendix, is holding her own, though her condition is serious.

Mrs. and Mrs. T. L. Montgomery and Art Flanagan motored to Hinton on Sunday for the day.

Mr. R. Allen, Miss J. O'Donnell and Mr. T. O'Donnell of Wayne motored over from Wayne on Sunday to visit Mr. H. Allen, principal of the Huesar school.

A crowd of young people had a winter's rest at the Backwater camp on Sunday.

There will be a picture show here on Wednesday evening, the first of the season.

The Sunday school opened again on Sunday.

CROP NEWS

BASSANO

Threshing in the Bassano district has slowly started and will be general by next week. The yield this year is comparatively low compared with other years, the average per acre on crop sown being 15 bushels, while the average yield in grain, threshed since from 12 to 15 bushels per acre.

A statement to The Mail says that estimates for grain handled by the two elevators here this fall will be from 12 to 14 thousand bushels.

COUNTRESS

Ralph Burrows commenced threshing last week, being among the first. General conditions show farmers finishing up cutting and getting ready to thresh.

GEM

Haying is nearly finished in the colony, and it is expected that threshing will be general next week.

HUSSAR

Six threshing machines are busy threshing in this vicinity.

ROSEMARY

Six threshing machines are busy threshing in this vicinity.

COUNTRESS

COUNTRESS, Sept. 9.—Mr. and Mrs. Snape and son Billy motored to Red Deer for a visit with Mrs. Snape's parents.

Mr. and Mrs. Gamble and the girls returned from a motor trip to Moose Jaw the last of the month.

Mrs. H. P. Ferguson and Mrs. Burrows are attending school at Duchsness this term.

Mr. and Mrs. W. C. B. Walsh and Mrs. Stue were visitors at the Leo Walsh ranch Sunday.

The ladies of the C. C. club met at Mrs. H. P. Ferguson's Wednesday, August 23. A delicious luncheon was served at the tea hour.

Miss Jessie Williams of Calgary arrived August 2 to take up duties as teacher at the Countess school.

Miss McCann and Miss Murdoch of Bassano were calling on Miss Williams at the teacherage last week.

Mrs. Snape and children, Phyllis and Alton, and Mrs. Horwood and son Mick motored from Calgary to spend the week-end at the Parrott home.

Joe Harvey is attending the Countess school this year.

Mr. and Mrs. Cadot entertained the following friends at a dinner on Sunday in honor of their daughter, Phyllis' twenty-first birthday. Father, Marjorie and Phyllis Cadot of Brooks, his in-laws of Bassano and Miss Walsh.

Mrs. L. E. Jones was in Medicine Hat on Saturday, returning Sunday.

Mr. and Mrs. Snape had as supper Sunday evening Mr. and Mrs. Cadot.

Mr. and Mrs. George McIntosh and Peggy spent the afternoon at the home of Mr. and Mrs. Snape.

Ralph Burrows commenced threshing last week. The farmers are busy finishing up cutting and getting ready to thresh.

Miss E. E. Ferguson spent a few days in the district last week visiting friends and making arrangements for her daughter, Marjorie, to attend the winter school term in Donna.

The Misses Jeanne, Donna and Marjorie Gamble were home from Bassano over the week-end.

CHANCELLOR

CHANCELLOR, Sept. 8.—Mr. and Mrs. Bert Stitt and Gordon of Bassano visited Mr. and Mrs. Stan McAllister on Wednesday.

Glen Phillips made a trip to Calgary on Tuesday.

Miss Marjorie Grant arrived in Chancellor on Sunday and re-opened school on Monday morning.

Mrs. H. P. Penke came home on Sunday after spending over two months in California, where she visited with friends and relatives.

The Chancellor W.G. group met at the home of Mrs. J. M. Wheatley on Thursday afternoon, with twenty members and visitors present.

Make Your Own Job

Conditions throughout the world during the past five years have admittedly been most discouraging to all people, but especially so to youth. As boys and girls have come out of school and college, ready to take their place in the business world, even at the bottom of the ladder, they have discovered there was no place for them. They have been denied even the opportunity of making a start because the financial and economic world has been out of joint, with business marking time, and no development work being undertaken.

As a result, thousands have become discouraged, embittered because of denied and frustrated hopes and ambitions, have become drifters because they have lost hope for the future and accepted the easy but mistaken view that present conditions must be accepted as permanent conditions. Lacking any background of years in which work was plentiful, and having no experience in profitable employment, they can see no light ahead.

Such an attitude of mind is a terrible mistake. Future years will be just as bright, in fact brighter; just as busy, in fact busier; just as rich in opportunity and in enterprising development, in fact more so. The world will not stand still, nor will it move backward. Since the beginning of time and the dawn of civilization the movement, despite temporary setbacks, has always been both onward and upward. It will continue so.

Consider the most familiar names of people and products on the lips of practically everybody to-day. Henry Ford, Firestone, H. J. Heinz, Coca-Cola, Borden's Milk, Hires Root Beer, Welch's Grape Juice, Maxwell House Coffee, Jell-O, and similar names. Do these names mean anything to the youth of to-day? They should.

It was in 1880 that Henry Ford began working on a double-cylinder engine in a little shop on his farm. When he went to work in Detroit at \$15 a month he took his shop along, and in 1893 his gasoline buggy was running and for a long time was the only automobile in Detroit. Forty years later he was one of the richest men in the world.

Firestone was a buggy salesman who became convinced there was a great future in the rubber business. He bought strips of rubber, cut out crude solid tires and fitted them to buggy wheels. Thus began the great tire industry of to-day.

H. J. Heinz used to grow horse-radish in his garden and peddle it from door to door. This backyard venture put him on the road to becoming Heinz 57.

In 1858 a doctor in Atlanta started working over a kettle in an old house. On the next corner was a drugstore, and periodically the doctor rubbed over, squirted carbonated water into a glass containing a sample of syrup, and tasted the mixture. After about 300 attempts he had the first Coca-Cola.

While holidaying in New Jersey, Charles E. Hires was served a drink by a farmer's wife. Its ingredients were sassafras, sassafras, and sweet fern, all gathered locally. Hires admired his wife. Returning home he experimented with herbs, roots and bark. This was Hires' Root Beer born.

John Wanamaker, the great merchant prince of the United States, delivered his first bit of goods from a warehouse. Adam Gilbey, founder of the stores which bear his name, started with a pack on his back. Timothy Eaton started in a little corner lot store. The story of Woolworth's five-and-ten-cent stores is too well known to call for repetition. The great Crane Company, manufacturers of piping, valves, bath-room fixtures, etc., had its inception in a little brass foundry.

These great enterprises of to-day had very humble beginnings, many of them within the life of the present generation. Opportunities are just as great to-day. "When going to enter our lives, probably happening this minute in a backyard workshop, where some craft is thinking by himself," Henry Ford declared recently. Another man states it this way: "Many of the million-dollar corporations of to-morrow are starting to-day with little capital but an idea, an idea which is being carried out in attics, cellars, kitchens, and in the minds of clerks behind store counters."

Recently the head of a huge business in America sells many different products sold about four new products, all launched since January, 1933, and now selling widely. David W. Brown, president of the company, said youth with an idea or capable of assimilating one, with vision, enterprise and daring can go as successful in our age as the Goliaths of big corporations.

To quote Henry Ford again, who recently said that unemployed people "should create their own businesses, no matter how small, instead of waiting for some one to give them a job." And as a writer in *Forbes* Magazine, from which much of the above is taken, says: "Ten years from now we will be reading more success stories gathered from the slums and ghettos of 1933." No one who has a work-bench or a stove and a dollar—and an idea—has any, need be discouraged.

Strange Service

700 Dear Mutos Worship In St. Paul's Cathedral

One of the strangest and most touching services ever held under the mighty dome of St. Paul's cathedral on a recent Sunday saw 700 deaf and dumb persons from 14 nations pray and sing without a sound being heard. They were athletes attending the eighth annual international games for the deaf and mute held in London. The service was conducted in the international sign language. Chaplains and organists mounted the lofty pulpit and voicelessly acted out the prayers, hymns and songs with eloquent looks and gestures.

Then the congregation joined in prayers and hymns.

A Large Birthday Gift

British Secretary Of Air Receives Two-Plane Hangar
Lord Londonderry, British Secretary of Air, has just celebrated his 67th birthday, and his wife's present to him was a hangar big enough to accommodate two airplanes. It stands on his estate at Mount Stewart, Newtownards, Northern Ireland, where there is already an airport with a landing field of 30 acres.

British laundries have an annual revenue of approximately \$10,000,000 from handkerchiefs alone.

Would Solve Problem

Shipment Of Eggs From England Made As Experiment

A few dozen English eggs are making history. Thirty of them arrived in Sydney, Australia, after an air journey from London to Brisbane and a railway journey of 500 miles from Brisbane to Sydney. The first reached Rio Grande do Sul, Brazil, after traveling more than 10,000 miles from London by air and sea. The eggs were shipped by air and sea. The eggs were shipped by air and sea. The eggs were shipped by air and sea.

More common coddies are contracted during October than in any other month, according to records of the public health service.

Before you invest in a going concern, make sure you know which way it is going. 2113

For So-Called Luxuries

Bureau Of Statistics Has Issued Some Interesting Figures

What are luxuries? The Dominion Bureau of Statistics started to compile figures on the luxuries produced and consumed in Canada in a year, and was confronted with the difficulty that one man's luxury is another man's ordinary, every-day comfort. This is true of food, furniture, clothes and so on. Even tobacco is claimed by some to be a necessity. So the bureau finally decided to list everything as a luxury which is actually above the line of necessities. It included, therefore, such things as carpets, silverware, jams and cooked meats, and so, naturally, it did not present its conclusions as a hard-and-fast statement of luxury consumption in Canada, but rather "an attempt to throw some light on the production and consumption in Canada of goods which are more or less in the nature of luxuries." It found that the factory value of these in 1933 was \$253,608,385, or 12.4 per cent. of the total value of production in Canadian manufacturing industry. The retail values would, of course, be much higher.

The bureau also obtained Canadian consumption figures by subtracting exports from the figures for imports and production. It found that in 1933 the so-called luxuries were consumed to a factory value of \$268,342,910.

Some of the individual items are rather interesting. Canada eats candy to the extent of nearly \$17,300,000 per year, or 186 cents for the extent of more than \$7,300,000; other confectionery, including chewing gum, over \$5,000,000. Pick, caviar and pastry account for more than \$10,500,000; beverages (not including tea, coffee, cocoa, etc.), nearly \$21,000,000; silk hosiery (which the bureau says is not often considered a luxury nowadays), nearly \$8,400,000; toilet preparations, over \$5,000,000. These are all factory values.

The average man in the list is that for tobacco, as follows:

1931	1933
Cigars \$ 6,016,138	\$ 4,768,000
Cigarettes 36,132,977	34,912,841
Other 32,842,202	31,586,679

These again are factory values. For passenger automobiles, bicycles and boats, the people of the Dominion paid the manufacturers less than half what they did for tobacco in both these years: \$28,254,084 in 1932, and \$24,218,970 in 1933.—Toronto Daily Star.

Favors Soft Sentences

Severity For Prisoners Demanded By German Minister Of Justice

"Severity" for prisoners as a Nazi tenet was demanded by Franz Gertner, minister of justice, in a speech during the 11th quinquennial penal penitentiary congress in Berlin.

"If criminal law is to represent authority and not only a threat to the community," he told the 400 delegates from 50 nations, "and hence defend and protect the national community from evil-doers, the logic of severity in the treatment of prisoners so the punishment may be appreciable to the evil."

The speaker also announced that the Nazi reich has definitely rejected the ancient legal principle: "Nulla poena sine lege" (no punishment unless a law is infringed). Instead, he said, it has substituted the maxim: "Nulla crimen sine poena," under which, punishment is meted out regardless of the incompleteness of a law.

American Boy Divers

Cruel Combination Of Many Articles Enables Boys To Submerge

Three Maine youths wanted to see what the bottom of Kennebec River in Richmond, Me., looked like. So the boys, Paul R. Byer, Stanley Griffin and Robert Cates, constructed diving apparatus from a five-gallon gasoline can, two automobile tire pumps, a small corrugated can and some cement.

The boys planned to attempt, they plan to explore greater depths.

Anxious To Know

A very nice old lady had a few words to say to her granddaughter.

"My dear," said the old lady, "I wish you would do something for me. You know how I love me never to use two words. One is swell and the other is lousy. Would you promise me that?"

"Why sure, Granny," said the girl. "What are the words?"

"Leprosy," reached the United States from both Europe and Africa. The oldest fruit known to mankind is the olive.

Celebrating Anniversary

Violin Industry Started In Germany Town 250 Years Ago

Mittenwald, Germany, a village in the mountains of Bavaria is now celebrating the 250th anniversary of its violin industry, begun in the 17th century by Mathias Klotz.

Throughout the summer the town folk presented a play, "The Song of the Stars," telling the story of Klotz and his wanderings over Italy, where he learned instrument making. The play will be staged again this winter at a nearby town as part of the entertainment for the winter Olympics.

The story of Mathias Klotz is a romantic one. When he was a boy of 10 his peasant family sent him to Italy to study under famous violin makers there. Twenty years later he returned to Mittenwald, opening his own workshop. Apprentices flocked to him and soon he established the fame of the town for fine instruments, a reputation Mittenwald retains to-day.

After making a number of instruments, Klotz's craftsmen had to go out into the world themselves to sell them. Strapping their violins on their backs they wandered through nearby countries, giving demonstrations and making sales in castles and great monasteries.

Correspondence Courses

Extending Education To Those Out Of Reach Of Schools

Nine years ago the Ontario department of education started correspondence courses for persons out of reach of school either for the whole school year or part of the summer months. The courses were intended also for those physically unable to attend school and for whom no provision was made for education.

During the last school year the enrolment was 1,800 of whom 50 were physically unable to attend school. The courses are free and the department pays all expenses. Average cost of educating a pupil for one year in this manner is from \$12 to \$15.

FASHION FANCIES

ATTRACTIVE HOME ENSEMBLE THAT HELPS TO MAKE KITCHEN CHOICES SO EASY

By Ellen Worth
Every woman who can't have too many home ensembles that will tub and tub and always come up to the mark.

And to-day's model is just lovely. The dress is suitable for the dining room, porch, marketing, etc. And incidentally, it's decidedly slimming.

The dress is white, which is also used for the dress trim. And isn't the on-again apron attractive? It has a flange at the shoulders and it won't slip off the shoulders.

Style No. 110 includes for the dress and the apron in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46-inch bust. Size 10 requires 3 1/2 yards of 36-inch material for dress with 1 1/2 yards of 36-inch material for apron and dress collar.

Patterns 15c each. Address mail orders to: Pattern Department, Wm. J. Nease, Newspaper Union, 176 McAdams Ave., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation ideas. Send for your copy today. The price is 15c.

Marking The Ballot

Strange As It May Seem, Many Voters Mutt The Job

Placing an X beside a candidate's name is a simple task but at the approaching Dominion general election it is likely 25,000 or more electors will mull the job.

In the 1920 count 24,119 lost their votes through improperly marked ballots and there are more parties and candidates this time to confuse the voter.

Parliament places the ballots in the hands of voters and supplies pencils to mark them. That is as much as it can do. Electors have only to make the crosses themselves. Yet in 1920 ballots were rejected in every constituency in Canada.

Markings in addition to the cross, use of a pen or colored pencil instead of the black pencil provided and signing of the ballot by the voter are the most frequent causes of spoiled ballots.

Through habit many men use their fountain pen and deputy returning officers throw out their ballots. On recounts, however, judges frequently have ruled such ballots valid. The Election Act says the cross must be made with a black pencil.

Many persons start to mark their X opposite the wrong name, score it out and then mark it opposite the candidate they wish to support. This spoils the ballot. They should ask the deputy returning officer for a new one.

Voters sometimes ask why all this fuss about markings when the voter's choice is plainly indicated? The answer is that precautions are necessary to discourage bribery. They are the culmination of years of experience with elections, the frailties of human nature and the cunning of some politicians.

In the '90s and earlier when the population was small, party workers knew which voters were Conservative, which Liberal and those "on the fence." Of the undecided party some would sell their votes and the temptation of workers in a close race was strong.

But unless the vote buyer could be sure those he bought went to his candidate there was no use buying them. Many ingenious devices were used to allow party scrutineers to identify ballots while they were being counted. The result has been the regulations to prevent distinguishing marks.

Election workers claim there is very little direct bribery now. Riches are so populous and party donations of voters so indefinite it would cost too much. In addition there is the almost certain risk of the election being voided.

Gift Was Acceptable

King Pleased With Jubilee Offering From Free State

The Jubilee present which Loyalists in the Irish Free State have given King George is declared to be not only nationally appropriate but most acceptable to His Majesty.

It is a beautiful antique silver potato ring, the rings, which measure up to a foot in diameter, were in former times put in the centre of the dining table and within them placed the potatoes, cooked in their jackets, to keep them from rolling about. Reminiscence of the days when the potato was the staple diet even of the wealthy, a sixteenth century ring of good design has sold a auction for considerably over \$5,000.

The King is so devoted to old silver as the Queen is to antique furniture. The ring is a gift from the Free State.

Scrambled Eggs

Motor Accident Scatters Truckload Of Eggs Over Highway

Marion Snyder, of Harlan, Ind., knows what 100,000 scrambled eggs look like.

Driving a truck over Pocono Mountain near Mt. Carmel, Pa., Snyder was forced to turn the machine sharply to avoid hitting a train. His cargo of 100,000 eggs was scattered over the highway for some distance.

Practically all of the eggs were broken.

Are Carefully Trained

Pigeons are trained as carefully for racing as a horse and usually when a pigeon becomes lost it is because it was in poor condition to start the race. The owners start training their birds at the age of two months. The pigeon reaches the peak of his racing between the ages of two and four years.

Rainbows are not semi-circles, but complete circles. If we were high enough in the air, we could see the entire circle.

It has been estimated that approximately 13 pounds of air is required to turn one pound of coal.

You can tell by his smile

Things are looking up... times have improved and he's again "telling his own" with Ogden's Fine Cut. Why not "get back to Ogden's" yourself and again give yourself the pleasure Ogden's alone can give. Use the best paper, too... "Vogue" or "Chanticleer."

52 Pokes Hands for number, now accepted as a complete set.

OGDEN'S FINE CUT
Your Pipe Knows Ogden's Cut Plug

Wiley Post

Some Of The Aerial Exploits Of This Famous Flyer

Here are the aerial exploits of Wiley Post, who with Will Rogers, film comedian, was killed in an airplane crash in Alaska.

With Harold Gatty, Post flew across the world in eight days, 15 hours, and 15 minutes, in 1931.

In 1933, he made a solo round-the-world flight, in seven days, 18 hours, and 40 minutes.

The following year, Post announced he would concentrate on the practical side of aviation. He made two sensational high altitude trips over his home town of Bartlesville, Okla., wearing a "super-charged suit" of his own design.

Post made four unsuccessful attempts to make a transcontinental flight through the stratosphere. Each time he was forced down on the way from Burbank, Cal., to New York, the last failure June 3, this year.

He used but one ship in all of his achievements—the "Winnie Mae."

Odd Trick Of Nature

Sailor Relates Story Of Three-Year Bath In 33 Fathoms

Nelson Lash was in the crew of the schooner "Lash" three years ago when she was rammed and sunk off Georges Banks. With his clothes in a forecastle locker was a pocket handkerchief, his initial embroidered in a corner.

Now Lash has his handkerchief again, for he's in the crew of the Louis A. Thibault, and in her sculler drag the crew found a handkerchief—with Lash's initials in the corner, in almost perfect condition after a three-year bath in 33 fathoms!

Only One Limit

Ten years ago the late Will Rogers was in a plane which had left Los Angeles for Kansas City. The ship hit an air-pocket and dropped 300 feet. "It's a how far," asked a frightened passenger, "can one of these planes drop?"

"Well," Rogers informed, "the ground is the limit, boys!"

Manassoth cave, Ky., has been equipped with 13 floodlights and 10 search projectors to illuminate its interior.

THE FOUR HORSEMEN OF THE WEST

War, Famine, Pestilence and Death were the Four Horsemen of the Apocalypse.

The ravages of these four dreaded horsemen devastated the human race and brought sorrow, misery and despair to mankind. Drouth, Frost, Rust and Hail are the four horsemen who ride these western provinces hard and their depredations are almost equally demoralizing to the people as the dreaded riders seen by the apostle John on the tiny island of Patmos.

This season the growing crops and the expanding hopes of the people have been cut down in turn by each of the plagues above-mentioned. Ruin has been widespread. Sorrow and suffering has come on many a farm home.

The growing season started propitiously. Early rains started the seeded field off in fine style with excellent germination. Then the north was flooded. The southern crops followed dry weather in the south, while did not grow so well and the northern crops were delayed.

Next came hail and then, untimely frosts hit the central and northern sections, ruining wonderful stands of grain. In the meantime the worst plague of rust the west has ever seen hit the lush crops of Manitoba and Saskatchewan.

So now what early looked like a really good crop gives promise of a poor return. That prices will be better is poor solace to those—only too many—who will have very little crop indeed. Every farmer likes a good crop even although the prices are low.

Our own Four Horsemen, creatures of destruction, have seen to it that good crops will be very few in Western Canada this harvest.

PROVINCIAL FINANCES

In the last week's issue of this newspaper we dealt with the finances of the province of Alberta in a broad way, showing the debt to be around \$153 million and the requirements of interest and sinking fund to be around \$8 million.

This debt service is, of course, the largest item of all expenditures. In fact it is about half the total cost of government. This is not generally known, for most people do not take the trouble to enquire.

It costs between \$8 million and \$9 million to conduct the ordinary affairs of the province. The largest item in this total is education, the sum being approximately \$2½ million. The next largest item is public works which run \$1½ million and public health is not far behind with \$1.1-1.3 million.

The foregoing are the big items. Then comes lands and mines which cost \$½ a million but bring in a revenue of \$1½ million; and the treasury which costs less than \$½ million but brings in a revenue of \$2¼ million. The executive council cost \$305,000, legislation \$230,000, agriculture \$325,000, municipal affairs \$125,000 and provincial secretary \$100,000.

If the interest on the debt was abolished, by some process which we cannot as yet discern, the cost of government would not be high and taxes could be cut materially. That must be obvious to all who have given the problem the most casual study.

The question is: if the province's indebtedness is repudiated which adverse action will result? British countries, the world over, have never tried such drastic methods. When Newfoundland threatened such action the old Mother Country, hard-pressed by tremendous indebtedness and extraordinarily heavy taxation, dug into the old sock to prevent repudiation.

It is doubtful if any Alberta government would consider repudiation and it is doubtful, if this is done, if the federal government would permit such a course to be followed. In the last eventuality Ottawa would take over the administration of affairs.

Meanwhile the province is going behind at the rate of a couple of million dollars a year.

The wheat board has fixed 87½¢ a bushel, No. 1 Northern, Fort William, as the minimum price for wheat.

This is a fair price and would mean a return of a fair degree of prosperity to Alberta and the west if the crop was generally high grade and the yield was good.

But the yield is not good; on the whole, and frost, drouth and rust have hit the quality hard.

No, not many farmers will get 87½¢ a bushel for their wheat.

A POSSIBILITY

What will happen if something turns up to deter the provincial government from putting social credit into effect?

Some people think that there will then be a return to the orthodox form of administration. But will there?

Maybe Alberta voters will be so aroused that other schemes will be tried and maybe something with potential dynamite in it.

When any far-reaching effort is attempted by a large number of people there is never a return to the "statu quo ante" even although the results obtained are only partially successful.

This is a matter that may come to a head in a couple of years, unless there is a turn—and a decided one—for the better.

Of course if the social credit plan materializes as promised everything will be hunky dory.

DR. GERSHAW CHOSEN LIBERAL CANDIDATE

Dr. Gershaw of Medicine Hat has been nominated as Liberal candidate in Medicine Hat riding, in the forthcoming federal election.

Medicine Hat riding extends westward for a considerable distance, a long peninsula reaching beyond Gleichen.

Dr. Gershaw was the sitting member in the last parliament and gave very good service.

Whether he can withstand the rising tide of social credit is a question we are not prepared to answer.

But Dr. Gershaw is a man of broad sympathies, independent mind and wide acquaintanceship.

THE GODS OF THE COPYBOOK MAXIMS

It is kind of puzzling for a young fellow to decide what is the right or wrong idea these modern days.

The Bible says: "By the sweat of your brow ye shall eat bread", following that Mackintosh Red episode in the Garden of Eden.

Our fathers and forefathers advised us to work hard and long and save our money.

Then from the "Gods of the Copybook Maxims" we read:

"We were living in the trees when they met us."

They showed us each in turn
That water would certainly wet us
And fire would certainly burn.

In the carboniferous era

We were promised abundance for all
By rubbing selective Peter

To pay to collect Paul.

And though we had plenty of money

There was nothing our money would buy
And the Gods of the Copybook Maxims

Said, "If you do not work you will die!"

To which we say, "Oh yeah! But where is there work to do for the young fellow just starting out?"

"LIPS THAT TOUCH LIQUOR—"

Those of us who have been wondering where Premier Aberhart of Alberta was going to get the money to pay \$25 a month to each Alberta citizen will be duly enlightened by an announcement that has just come out of that province.

There will be no \$25 dividend, it seems, for those who drink.

That rule should knock at least 50 per cent of the populace off the Social Credit payroll at one fell swoop.

The next crowd to go off the payroll, doubtless, will be the smokers.

Then we may expect a ban against card players, dancers, crooners and saxophone tooters and gentlemen who shoot pea pool. . . . That is to say where the real pious fellow will get his \$25 and the semi-pious lad may get \$10 and so on, the more awful sinners, including the hellers and the zither players, may eventually, on the other hand, have to pay something into the treasury.

Says Premier Aberhart: "Lips that touch liquor shall never touch mine."

"Your what?" asks Alberta.

"My mouth!" answers the Premier.

All of which indicates that the game of practical politics can be played under Social Credit as well as under anything else.—The Vancouver Sun.

We gently suggest to one of our Southern Alberta exchanges to check up on the spelling of "creditor" as applied to Social Credit.

AND THEN HE WROTE A LETTER TO THE EDITOR

Public Debt Has Risen Rapidly

Editor, The Mail.

Sir: Under the above headline the Calgary Herald says in part (Sept. 7th) that "Alberta's public debt, including indirect liabilities, or guarantees now total \$161,884,759. As the province started clear of debt in 1905 the average annual increase, during 30 years of provincial administration was around five millions."

It also states that in 1921 the debt stood at \$32,072,204 including funded and unfunded debt and indirect liabilities.

According to these figures the average increase for the first 16 years was 5.34 millions, and for the last 14 years a little under 5 millions.

It goes on to say that "it will be agreed that this has involved ambitious spending for a young and ambitious province. The telephone system, the construction of highways and bridges, public buildings, including the legislative buildings, and outlays on irrigation cost large sums of money. There was also a big investment in the northern railways, a portion of which has been recovered by the sale of these lines to the transcontinental systems."

By this we are to understand that large amounts of these debts have since 1921 are a direct responsibility on events occurring before that date. This then changes the ratio of responsibility.

It is also possible that in the "indirect liabilities" is included the Alberta Wheat Pool guarantee of over 6 millions, which at this time has made several of its 20 year payments, as well as adding large sums to their reserves, and when the profits of their elevator system for more than a year (under normal conditions) are added to their reserves now on hand they will equal the entire amount of their indebtedness.

No doubt it was the present favourable condition of the pool's finances that caused their management to petition the grain commission for lower handling charges during the present crisis.

However this is only part of the story, for the compounded interest on \$2,000,000 at 5 per cent for 14 years is over 20 millions greater than the increase in our provincial debt during that time.

Therefore there can be but one conclusion, that if there had been no debt in 1921 there would have been some now, but instead a surplus in our provincial treasury.

As there has been so many confusing statements made in regard to the finances of our province, I take this opportunity to thank the Herald for the above statements, and I also wish to express my appreciation for space in your paper to present my version of them to your readers. W.H.H.

Col. Lawrence's Last Book To Sell At \$500,000 A Copy

"The Mint Said to Contain Entire Criticisms of Men and Institutions

ONLY TEN COPIES

The highest price ever quoted on a book at publication will attend those who inquire next winter about "The Mint," by Alexander Ross.

The price is \$500,000 the copy. Alexander Ross is T. E. Shaw and T. E. Lawrence and "Lawrence of Arabia."

One of the greatest potboilers ever kicked up about a book attended the almost surreptitious publication of his "Seven Pillars of Wisdom" in 1926.

But Lawrence also left a manuscript entitled cryptically, "The

Mint." It is nearly 70,000 words long and contains Lawrence's experiences after the end of "Seven Pillars," particularly his experiences in the Royal Air Force.

His criticisms of living men, of British institutions and of the professions of soldiers and several other things are described by one who has seen the manuscript as so stringent that publication may not be allowed in England for many years, if ever. Lawrence wished it to be protected, but kept it out of circulation.

So the book is to be set up and printed by Doubleday, Doran and Co. Two copies will be sent to Washington to secure copyright. Ten copies will be kept for sale. But it is not believed that there will be any takers at \$500,000.

NOOZIE

OUR REFORMERS SEEM TO WANT LIFE LIBERTY AND THE PURSUIT OF OTHER PEOPLE'S HAPPINESS!

—And a Pinch of Salt

When the body perspires, it loses at least two substances, water and sodium chloride, both of which it needs. Drinking water will replace the former, but not the latter. Therefore, as perspiration continues, the body's reserves of sodium chloride are steadily depleted, and it is this depletion which gives rise to the distressing symptoms of tiredness and exhaustion. If it is prevented by giving small amounts of salt with the drinking water, the painful symptoms do not follow, and if they have arisen, the administration of saline water affords sure relief. Each passing year sees the adoption of the salt therapy by new industries, and it is even now for the real high-temperature industries, a well established practice.

And in the office when there's barely a breath of air stirring and everybody feels the heat (not to mention the humidity), the little dose of I've resigned before I begin."

salt will help to give fresh kick and make tiredness and that fagged-out feeling less trying.

When the farmer, who must make hay while the sun shines regardless of temperature, goes out to the fields for a day of toil in the broiling sun, he can add to his comfort and reduce his risk of heat prostration by slipping a teaspoonful of salt into the bucket of water that he carries with him. And what is true of man is true, likewise, of beast. The horses that pull the harvesting machinery will be grateful for a little extra salt. But—salt won't help the dog, for dogs don't sweat. They have no sweat glands.

Too Much of a Route

An old negro was taking a civil service examination for the position of rural mail carrier. One of the questions asked was "How far is it from the moon to the earth?" The old darky exclaimed, "If you all is gwinter put me on that route, I'll be gwinter put me on that route."

A Real Politician

He was candidate for senatorial honors, and was scheduled to speak in a small town. Anxious to discover the religious affiliation of the majority of his audience, he addressed them in this manner:

"My great grandfather was an Episcopalian (silence), but my great grandfather belonged to the Presbyterian church (more silence). My grandfather was a Baptist (silence), but my grandmother was a Congregationalist (continued silence)."

"But I had a great-uncle who was a Methodist (loud applause) — and I have always followed my great-uncle!"

The Only Way

A candidate for the police force was being verbally examined. "If you were by yourself in a police car and were pursued by a desperate gang of criminals in another car doing to miles an hour on a lonely road, what would you do?"

The candidate looked puzzled for a moment. Then he replied, "Fifty."

87½¢ Minimum Wheat Price Not 40¢

The grain growers of Western Canada who have closely followed the wheat situation in Canada over the past few months will realize the advantage of having strong co-operative marketing organizations in the grain business.

A reasonable minimum price has been fixed for wheat by the Wheat Board.

LEADING PAINT MANUFACTURERS ANNOUNCE

PRICE REDUCTION

First Quality House Paint

Now

\$3.95

per gallon

(Whites Slightly Higher)

The Quality Remains Exactly The Same. Only The Price Is Changed.

Dating from to-day, the price of first quality house paints manufactured and sold by the undersigned companies is reduced to \$3.95 per gallon.

There has been no change in market conditions or manufacturing costs to justify this step. We feel, however, there is urgent need for action that will make it possible for house holders to obtain the highest quality paints at the lowest price consistent with strict maintenance of quality.

Thousands of people all over the country have been forced to put off much needed painting. Thousands more have been misled by "bargain" prices into using inferior paint of little or no value. We want to make it easier for you to enjoy the advantages of painting with first quality paint only, and are confident that the generous reduction in price now announced is the best way to accomplish this.

WORLD HAPPENINGS BRIEFLY TOLD

French war veterans on a friendly visit to Canada were hosts to prominent Montreal war veterans and militia men.

Since Jan. 1 six swimmers in the harbor at Sydney, N.S.W., have been attacked by sharks and only two have survived their injuries.

The high price of pork has made the hunting of wild hogs a paying sport. The meat brings about nine cents a pound in Texas.

A Corning, N.Y., minister's wife was denied United States citizenship because she refused to subscribe to the stipulation that she war arms for the United States in time of war.

Bound for Idaho, a shipment of 75 purebred Suffolk rams left Calgary recently. The sheep were consigned to breeders at Caldwell, Idaho, marking a new export outlet for Alberta.

Despite poor crops, the Doukhobor community in the west will meet their obligations this fall, M. W. Czakoff, Oregon, Sask., is reported as stating.

A television broadcasting tower is being built on top of the Eiffel Tower in Paris and is expected to provide regular service after three months' testing.

Apple and other fruit trees will be planted in Moscow streets instead of the usual shade variety. State farmers were ordered to supply 100,000 fruit trees to be planted at Moscow beginning in 1938.

The crushing blow which flood waters dealt to the lines of the Northern Alberta railroads last month will necessitate immediate repair conservatively estimated at \$250,000.

The Soviet Union's grain acreage as of Aug. 15 totalled approximately 142,000,000, an area comprising 68 per cent of the cultivated cereal lands. It was announced that the total is about 7,000,000 acres above that for the same date last year.

William Green, president of the American Federation of Labor, was in a speech before the state labor federation's convention that the six-hour working day and the five-day working week must come to be given to those who did not have them.

Gifts For Aviators

Winnipeg Pilots Going To South Pole Wear City's Crest

When Pilot H. Hollick-Kenyon and J. H. Lyburner fly with the Lincoln Ellsworth expedition down the South Polar region during the coming summer months of the southern hemisphere, they will wear pins to their breasts, two small silver replicas of the coat-of-arms of Winnipeg.

The gifts were presented to the men by Mayor John Green at a dinner given by the Aviation League of Manitoba. "These gentlemen," said the mayor, "will carry the good wishes and the high hopes and expectations of the people of Winnipeg for your success."

"But they are like a Scotch girl," his worship added, "There is a string attached to the giving. When they come back next May, I presume the Aviation League will have a celebration in honor of your return, and we want you to hand them back to the mayor of Winnipeg then so that they can be framed and kept in the city hall as mementoes of the interest the city of Winnipeg has in this expedition, which we hope will be historic."

J. B. Coyne, president of the league, said Manitoba has a special interest in polar expeditions by reason of the fact Franklin tried to find a northwest passage to the Orient north of Canada, and so gave lead to Arctic exploration.

The right which will be undertaken by Lincoln Ellsworth, with Hollick-Kenyon piloting, between Weddell Sea and Ross Sea, is 2,800 miles, as far as from Montreal to Vancouver.

Monster Ice Breaker

Russian Ship Will Keep Northern Sea Route Open

Declared by Soviet authorities to be the largest ice-breaker in the world, a ship with 24,000 horsepower engines is being constructed near Leningrad. The new craft will be able to cross the 4,000 miles of the northern sea route without journey. Other ships can follow in its tracks, greatly accelerating the journey. It is hoped that Arctic exploration also will be facilitated.

The moon not only causes a tidal wave on the side of the earth nearest to it, but also causes a wave on the opposite side of the earth.

Claims Cure For Glaucoma

Dread Eye Disease Victim To Drug Says Specialist

A dreadful word among doctors is glaucoma, hardening of the eye-balls. Salt and water in the blood seep out of the blood vessels of the eye and into the eye's cavity. Because this salty liquid cannot escape, it causes the retina against the wall of the eye, slowly destroys the tassel and of the optic nerve. Vision dim, blindness ensues. Drugs have proved of little help; surgery gives only temporary relief.

Dr. Emanuel M. (for ephony) Josephson, Manhattan eye and ear specialist, announced in science that he had at last ascertained the true cause of glaucoma and could cure it with a drug.

The cause, he declared, was derangement of the adrenal glands. Those glands, situated one above each kidney, secrete two hormones—adrenalin in the core, cortin in the hulls. One of adrenalin's effects is to draw sugar into the blood.

The effects of cortin, scarcer substance, are less well known. Among such effects is control of the amount of salt and water in the blood. Scarcity of cortin in the system increases the permeability of the walls of blood vessels and capillaries, permits a leakage of salty fluid from the blood.

Such leakage occurs in glaucoma, says Dr. Josephson, reasoned, probably because the patient's adrenal glands supply too little cortin. He bought some cortin at a drug store, injected it into the muscles of glaucoma patients. Usually within half an hour eye pressure dropped to normal, tension and pain in the eyeballs ceased, and many purblind patients could see clearly for the first time in years.

Pursuing a hypothesis, Dr. Josephson gave cortin to near-sighted children. In most cases the vision improved. That must mean, he decided, that myopia and glaucoma are due to the same thing.

Canada's Trade With Italy

Imports Last Year Valued At \$275,000,000 And Exports Over \$250,000,000

With Prime Minister Signor Bello Mussolini so much in the newspaper headlines, people are apt to forget that Italy is still a kingdom and that the king is Victor Emmanuel II. Italian unity was accomplished by a heroic struggle continuing from 1848 to 1870. Cavour, the statesman, Mazzini, the philosopher, and Garibaldi, the soldier, being the principal figures. From a constitutional monarchy the kingdom's government has become, since 1922, a Fascist state, the basic idea being that the corporative or guild state based upon capitalism is supreme over the economic and social groups within the nation.

The peninsula and the seventy islands belonging to Italy have an area of less than one-third the size of Canada, but the population of forty-two million is four times that of all Canada. There is a large settled and floating population.

The House of Savoy, the principal figures. From a constitutional monarchy the kingdom's government has become, since 1922, a Fascist state, the basic idea being that the corporative or guild state based upon capitalism is supreme over the economic and social groups within the nation.

Fruit Of Enormous Size

Strawberries In Alaska So Big One Fills Teacup

Strawberries, luxuriant and so big that one would fill a teacup, and rubarb with stalks as thick as the wrist and three to four feet high, yet as tender and juicy as the berries which grow in the United States, were found in Alaska by Harry J. Lance, Jr., of the Philadelphia Academy of Natural Science expedition that went there to study the blue bean. Offsetting the advantages of the fruits and vegetables of enormous size and quality are the insects which also grow to enormous size. The mosquitoes, he reports, are twice as large and ten times as vicious as the Jersey variety. The party had to wear net masks—New York Herald Tribune.

Dear Old Soul—but, doctor, if this is going to make me 10 years younger, how do I stand about my old-age pension? 2113

It's Victoria's tree-shaded motor roads that have helped to win for the city the name of Canada's Evergreen Playground.

Aerobic Roller Skaters

Three High-Speed Russian Artists Performing in London

The most "revolutionary" Russians in the world have arrived in London. They are the Three Cosacka, high-speed aerobic roller skaters, (two men and a girl), who whirl round at 130 m.p.h. on a table only eight feet square.

"This is the smallest table anyone has ever skated on and lived," John Gajdosky, the leader, said at the Victoria, where the trio are appearing in cabaret.

"There is a black line running round the table several inches from the rim. All the time we are spinning we keep our eyes on that line and never go outside it."

"Our slowest speed," he said, "is 60 m.p.h., and when working up to a climax we sometimes touch 130 m.p.h."

The Three Cosacka's chief fear is "centrifugality"—breaking of blood vessels in the eyes or legs due to their becoming overlanded in the high-speed whirling—London Daily Mirror.

For H.B. Route

Meteorological Station At Chesherfield Inlet Is Urged In London

Resolutions urging establishment of a meteorological station at Chesherfield Inlet on the Hudson Bay route and of an ocean observatory at Inlet Tristan de Cunha Isle in the South Atlantic were passed by a conference of empire meteorologists.

The savants met in private sessions in London. James Patterson, of the government meteorological service at Toronto, attended as one of the directors of every meteorological service in the empire.

The biggest frosts in North America are the bullfrogs, which may have bodies eight inches long.

The world's largest kitchen is that of the Waldorf-Astoria, New York.

Blue, green, yellow, red and even black snow has fallen in various parts of the world.

Insect Killing Machine

Engineer Uses Artificial Fever To Annihilate White Ants

A Minneapolis engineer has devised the "artificial fever" method of treating certain human diseases to the problem of ridding the civilized world of unpleasant insects as an exhibition at San Francisco.

Electrical Engineer E. L. Brown, inventor of the apparatus, demonstrated it before a score or so of California's most noted scientists, who watched with great interest while Brown annihilated a colony of termites flourishing in a piece of wood he had with him.

Termites, antlike creatures that feed on wood, are also another pest of interest. It is possible to raise seven crops of corn a year on this great interest, and not the least amazing feature was a primitive but effective shaver installed in a niche in a wall. The delegates had a Mexican dinner in a restaurant made in a cave below the pyramids.

The Floating Gardens, where land is so valuable that no houses are built on it, was also another point of interest. It is possible to raise seven crops of corn a year on this great interest, and not the least amazing feature was a primitive but effective shaver installed in a niche in a wall. The delegates had a Mexican dinner in a restaurant made in a cave below the pyramids.

The Japanese, he said, build all their own machines now. Like all other great powers, Japan bought the machines of other countries for study, but now was able to produce excellent flying machines and engines herself. He is returning to France after two months in Japan.

Obsolete Laws Unearthed

Sadly Out of Date Detroit Has Some City Ordinances

Detroit, Michigan, still has a speed limit of six miles an hour for horses and sleighs and an ordinance against leaving open gutters in the streets. In a letter suggesting that the city should get rid of such antiquated laws, City Clerk Richard W. Reading pointed out that it is illegal to hitch a horse to a fence or to the Solidus and Station monument in Cadillac square although there has been no fence there for years; that it is illegal to herd goats on the city streets; and that to allow geese on Woodward avenue, or to back mules across a sidewalk.

Will Earn His Pension

Man Starts 700-Mile Walk To Get Birth Certificate

Intent on proving that he is more than 70 years of age, and entitled to the Ontario old age pension, William Staley has started on a 700-mile journey, most of it by foot, in search of his birth certificate. His destination is more than 100 miles west of Chicago. There he hopes to get his birth certificate from relatives who have refused to forward it to him by mail. Most of his life has been spent in rural districts about 40 miles northeast of Toronto, and it was from there he started his journey.

Chinese Medicine Men Had Most Unusual Idea

Chinese patent medicine shops in Canton are using money as an advertising medium. They stamp their names, address, and telephone numbers on all banknotes, which pass through their hands, with a list of articles for sale. The banks have had to issue an order forbidding the practice.

Only the very poor or the very rich are able to own more than one dog.

French military authorities have ruled that bandmen must learn to be telegraphers too.

Found Mexico Interesting

Rotarian Delegates Report Temperature Even And The Climate Ideal

No need to go to Alaska to be cool or to Egypt to see the pyramids, according to Mrs. H. B. Flint, Rotarian, Ont., who with her husband, attended the Rotary International conference in Mexico City. It's never too hot and never too cold down there, and the Aztec pyramids are almost as interesting as the famous ones on the banks of the storied Nile.

Mexico, situated 7,500 feet above sea level, has an even temperature, never above 78 and never below 60, the visitors were told. It has retained many quaint customs.

In a city of more than 1,000,000 inhabitants there are only two machine laundries. Mrs. Flint said, for the women still adhere to the primitive method of washing their clothes in the streams with a flat rock to rub on.

The pyramids built by the Aztecs several hundred years ago, were of great interest, and not the least amazing feature was a primitive but effective shaver installed in a niche in a wall. The delegates had a Mexican dinner in a restaurant made in a cave below the pyramids.

The Floating Gardens, where land is so valuable that no houses are built on it, was also another point of interest. It is possible to raise seven crops of corn a year on this great interest, and not the least amazing feature was a primitive but effective shaver installed in a niche in a wall. The delegates had a Mexican dinner in a restaurant made in a cave below the pyramids.

The Japanese, he said, build all their own machines now. Like all other great powers, Japan bought the machines of other countries for study, but now was able to produce excellent flying machines and engines herself. He is returning to France after two months in Japan.

Japs Build Own 'Planes

First Machines Were Bought To Study Their Construction

The suggestion, sometimes heard that the Japanese do not make good airmen was emphatically denied by C. Waegele, prominent French aeronautical engineer, who was aboard the R.M.S. Empress of Asia when he docked from Oriental ports. The Japanese, said Mr. Waegele, have never, which is the main requisite of a good pilot. Their reflexes are good, as can be judged by the way their taxi-drivers get about the streets of Tokyo.

The Japanese, he said, build all their own machines now. Like all other great powers, Japan bought the machines of other countries for study, but now was able to produce excellent flying machines and engines herself. He is returning to France after two months in Japan.

Little Journeys In Science

IRON

(By Gordon H. Dugst, M.A.)

Iron has played a very important role in the history of mankind and the chemist has seen the most useful of all the metals. The iron used by ancient man was soft and easily worked. The early iron was made from charcoal and defensive weapons of it, but a sword that would bend under the weight of a blow as compared with weapons of stiff bronze. The smith of the eighth century knew how to harden and temper iron and they used in the age of chivalry steel-clad knights. The products of these skilled workers of the medieval forges—Toluid blades, Damascus scimitars, Italian chain mail, and Moorish armor—are famous in song and story. Indeed, they were almost as good as their legendary reputation.

Iron occurs very abundantly in nature and makes up about five per cent of the earth's crust. Scientists have calculated that the centre of the earth consists of a sphere of metallic iron 4,000 miles in diameter, and covering this sphere is a layer of silicate of iron 1,000 miles thick. If this is true, iron is by far the most abundant element in the world. It is found combined with other elements in many minerals. The blood of animals and human beings is a constituent of the green coloring matter of plants and the hemoglobin of the blood of animals and human beings plays a very important part in life processes.

Hematite, known by the scientist as ferrous oxide, is the most important ore of iron ore. This ore is found in large quantities in the neighborhood of Lake Superior in the United States and in Michigan. It is interesting to know that a ton of hematite gives a certain solid and rocks. Finely divided hematite is used very extensively as a pigment.

Brown hematite, or limonite, is another very important iron ore. This ore is found in large quantities in the neighborhood of Lake Superior in the United States and in Michigan. It is interesting to know that a ton of hematite gives a certain solid and rocks. Finely divided hematite is used very extensively as a pigment.

Iron differs from some of the other metals in that the industries in that the pure metal is rarely obtained in nature. It is usually obtained from which contains small quantities of other elements shows a great range of properties and is of the greatest industrial importance. Carbon is always present in iron, and the amount of carbon from slight traces up to seven per cent. There are many varieties of iron, and the most common of which are pig iron, cast iron, wrought iron, and steel.

Demand For Lemons

People In Italy Are Using Them For Their Health

A report from Washington says there is a lemon shortage, due to the falling off of imports from Sicily. The shortage is due to the Italian purchases of lemons for the use of the Italian expeditionary forces against the Germans.

The shortage, however, is not the whole truth. Americans returning from Italy report that country completely lacks in the subject of lemons. The Italians have discovered that the lemon is not only a preventive of scurvy, but a reducer of high blood pressure and a cure for indigestion. A dozen lemons a day keep the doctor away. A gentleman in Cremona is reported to have healed himself of whatever ailed him by consuming 60 lemons a day.

The enormous demand for lemons to keep Italians healthy has put under requisition the entire Sicilian crop, and lemons are being imported from Spain, Portugal and Greece. The Italian colonies in Africa are rolling in wealth.

From the medical standpoint there is something to be said for the new craze, for in a country where butter is scarce and nearly everything is cooked or doused in olive oil, an acid in the diet is essential.

Meanwhile the Italian consumption of lemons is bringing joy to Californian growers, who hope that prices will go up still further—Detroit News.

Story Of Homer's Iliad

Professor R. A. Dora has placed in a London sale deposit manuscripts 3,000 and 4,000 years old, which, he says, prove that the story of Homer's Iliad, greatest of classical Greek poems, the epic of Helen of Troy, which has been a household name since, originated in an Indian epic poem written centuries before Homer was born.

Panama is to attempt to grow rubber, and 30,000 trees are being planted.

The fellow who tells you how hard he works wouldn't have time to tell you so if it were true.

Household Arts

by Alice Brooks

Cross Stitch these Covers in Gay Colors

PATTERN \$250

Dress up your kitchen so you will be proud of it! Add decoration with these effective manner towels. You'll love embroidering them—each motif is a different household task—each lends itself to the use of a variety of colors—and there's one for each day of the week. Make them for the housewife for a bridge—a shower gift. Their droll design will make them welcome anywhere.

In pattern \$250 you will find a transfer pattern of seven motifs averaging 9 1/2 x 14 inches, material requirements and color schemes.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Home Arts Dept., Winnipeg Newspaper Union, 178 McDermott Ave., N. Winnipeg.

There is no Alice Brooks pattern book published

Open Season For Hungarian Part

South of the Banff-Calgary-Bassano
Medicine Hat Branch of C.P.R.

The following is from the August 31 issue of the Alberta Gazette: Comportage may be shot. It is of vital interest to local people, as Bassano is on a boundary line.

The holder of a general game license or a game bird license may hunt, shoot at, take or kill Hungarian partridge—

(a) between 12 o'clock mid-day on the 14th of September up to and including the 30th day of November, in that part of the Province lying to the south of a line described as follows: Starting at a point where the Canadian Pacific Railway intersects the Game Preserve Boundary at or near the hamlet of Seebe, thence easterly along the said railway through Calgary, Bassano, Brooks and Medicine Hat to a point where it intersects the inter-provincial boundary between Alberta and Saskatchewan.

North of the Banff-Calgary-Bassano—Medicine Hat Branch of the C.P.R. (b) between the 1st day of October

Local and Personal News

Mrs. M. H. Gamble and daughter, Jeanne, Donna and Marlene of Coon Rapids are residing in town while the girls attend high school here.

Mr. and Mrs. J. Blash of Duchess took part in the golf tournament held at Medicine Hat last week. They did very well in the competition.

Mr. and Mrs. B. Lawrie of Hussar motored to Bassano on Saturday to have Mrs. Lawrie, who had been run into by a bicycle, attended to by Dr. Scott.

Miss Margaret Deisher will attend St. Joseph's hospital training school for nurses at Victoria this year. She left on Thursday morning for the B.C. capital city.

Mr. and Mrs. Harry Maurer spent Sunday at Hussar; Mrs. Dundas, who has been visiting her niece, Mrs. Maurer, for the past three weeks, returned with them.

The death occurred in Ingersoll, Ontario, recently of William Stone, prominent industrialist and financial man. He was married in 1929 to Mrs. ugh Stainleigh of Hussar.

Wm. Brodie, Gordon Park, Norman Stiles and Don Maurer started out by car to a baseball game at Dunchant last Sunday, but after driving nearly 150 miles they didn't get there. The ferry over the Bow east of here was under the water, which would have made them arrive too late at their destination.

her and the 30th day of November (both dates inclusive), in that part of the Province lying north of the line last described.

Mrs. Robson of Dorothy was in town last week.

Dr. A. G. Scott was in Hussar on Sunday morning.

Mrs. Roy Warburton of Hussar spent Sunday with Mrs. A. H. Maurer.

Mrs. A. Anderson and Emerson Brown of Hussar were Bassano visitors on Monday.

Miss Cora Bowers of Cable, Ohio, is visiting at the home of Mr. and Mrs. Harry Jones.

Phil Platt of Duchess has been secured by Herb Walnes as mechanic in the Texaco garage.

Miss V. McCannel and Miss C. Murdoch called at Miss Williams, teacher of the Catholic school, last week.

Rev. John Hart will deliver his farewell sermon at the Presbyterian church on Sunday, September 15.

Mrs. A. G. Scott and George and Howard Sandhu motored to Calgary last Friday for the week-end.

Mr. and Mrs. Bert Stitt and Gordon visited with Mr. and Mrs. Blum McAllister of Chancellors last Wednesday.

Wm. McLean and Dr. A. G. Scott were in Calgary last week and attended the Sarnia-Bronk football game.

How Valley Resource (Arrowwood)—Miss Dorene Roberge of Bassano spent last week-end with Miss Hazel Taylor.

Hazel Barlow and Dorothy Flanagan are home this week from Calgary and will return next Monday to Normal school there.

Miss Lorraine Parrott of Coon Rapids is staying at the home of Mr. and Mrs. A. White while attending the Bassano high school.

Celebrate Silver Wedding
Rev. and Mrs. John Hart of Bassano celebrated their Silver Wedding anniversary on Monday, September 9. The community extends their wholehearted congratulations.
Rev. and Mrs. Hart, accompanied by David, left on that day to spend a few days in Banff.
